

# COMPANY PROFILE

# **TRU-TRACK PLASTOPACK PVT. LTD.**

## **About Us.**

We are dedicated towards delivering best quality packaging products which includes **HDPE Cement Bag, White Jumbo Bag, Plain Jumbo Bag, Laminated HDPE Tarpaulin, Designer Non Woven Carry Bag, BOPP Salt Bag**, etc., at the most honest prices.

We have been in this field since 1996 and we have been recognized as a leading **manufacturer, supplier** and an **exporter** of some of the best packaging solutions. The range which we produce includes **BOPP Salt Bag, White Jumbo Bag, Plain Jumbo Bag, Plain Non Woven Carry Bag, Multi Layer Food Packaging Pouch, HDPE Cement Bag, Jute Non Woven Carry Bag**, and specialized products. These products are of superior quality, optimum strength, affordable pricing as well as modern design, which is the reason why these are immensely demanded by many industries in the market.

Tru-Track is committed to the pursuit of excellence and therefore invests in each of its business to provide the best technology, material and people for best support for our customers. The quality ability and integrity in our employees have resulted in a client base of large reputable and prestigious customers who return to us with new projects consistently.

## Our wide range of quality Products

1. HDPE or PP woven sacks fabric & bags
2. Jumbo bag
3. Tarpaulin
4. Silpaulin tarpaulin
5. Pp Leno bag
6. Monofilament net bag for garlic & onion
7. HD mesh bag for all fruits & vegetables
8. Jute bag for garlic & onion
9. Canvas tarpaulin
10. Garbage bag for hotel & hospital multi-purpose
11. Ld liner bag for industrial use
12. Ld / pp pouch & flexor printing
13. Paper bag for industrial chemical and multi purpose
14. Designer paper bag for shopping and multi purpose
15. Green shed net
16. Jute shopping bags
17. Bopp rice bag & salt bag
18. Aluminum foils pouch & bag
19. Multi color two & three layers pouch for spices & other product & multi color Gravure printing
20. Non woven carry bag & shopping bag

## **1. HDPE or PP woven sacks fabric & bags**

**HDPE PP Woven bags / Polypropylene sacks** are used for construction of temporary tents, make various travel bags, cement Industry as Cement Bags, Agricultural Industry as Potato Bag, Onion Bag, Salt Bag, Flour bag, Rice Bag, etc

These **bags** are used when the particle size of the product to be packed is very fine making it possible for it to ooze out of the **woven bag**. Hence an additional liner ensures its proper packing without any leakage of material.

## **2. Jumbo bag**

Jumbo Bags, also known as FIBC Jumbo Bags or Bulk Bags, are the preferred choice for nearly every industry today that needs to store, pack and transport solid dry bulk materials. Besides their space- and cost-saving qualities, these specially designed bags are known for their flexibility of use, weight carrying capacities, and ability to withstand tough conditions.

### **3. Tarpaulin**

Tarpaulin is a large sheet of strong, flexible, water-resistant or waterproof material. Tarpaulins are used in many ways to protect persons and things from wind, rain, and sunlight. They are used during construction or after disasters to protect partially built or damaged structures, to prevent mess during painting and similar activities

### **4. Silpaulin tarpaulin**

The **Silpaulin** Sheets & Covers are durable, light weight, waterproof made to resist stains, punctures, heat. They are designed for easy handling & are available in a various of colours and thicknesses.

### **5. Canvas tarpaulin**

Canvas Tarpaulins are made out of 100% Cotton Single Duck fabric and are mainly used in transportation and industrial applications where absorption of paints, etc. is essential. Canvas Tarpaulins are available in various sizes.

#### **Benefits of Canvas tarpaulin**

- **Canvas Tarps Are Breathable:** **Canvas** is a very breathable material even after being treated for water resistance.
- **Environmentally Friendly:** Most flatbed truck **tarps** are made of vinyl, polypropylene, or polyethylene.
- **Extremely Versatile**
- **It Can Be Treated or Untreated**
- **Easy to Handle**

## **6. Pp Leno bag**

**PP Woven Leno bag** is used for packaging Agriculture Produce, Flower, Fruits, Vegetables etc and are made as per size. By providing proper ventilation, the **use** of these bags ensure vegetables and fruits placed inside them remain fresh for a longer time.

## **7. Monofilament net bag for garlic & onion**

Monofilament net bags woven from a single thread and available in different mesh sizes and densities. Woven monofilament net bags are commonly used for packing hard skin products. L-sewn net bags without drawstring in various sizes to suit the product to be packed.

## **8. HD mesh bag for all fruits & vegetables**

HD Mesh bags are used for all three, as they are a handy way of keeping fruit and other large loose items together. They are strong and they also allow air to circulate, meaning that the contents do not get rotten. This is why they are commonly used in the fresh produce market.

## **9. Jute bag for garlic & onion**

Jute bag are Reusable, Environmental friendly. It is 100% bio-degradable and recyclable, it is really Cost effective. Jute bags are Strong and can carry more weight as compared to promotional carry bags. It is Durable and long lasting.

## **10. Garbage bag for hotel & hospital multi-purpose**

*Garbage bags are used to dispose the trash easily and to maintain Cleanliness & Hygiene. The garbage bags that is strong and durable. It also avoids the trash smell and keeps the place neat and clean. It is a disposable bag used to contain solid waste. These bags are useful to line the insides of waste containers to prevent the insides of the receptacle from becoming coated in waste material.*

## **11. LD liner bag for industrial use**

*LD Bags are used in various Industries such as Automobile, Chemical, Pharmaceutical, Garments, Textile, etc for packing of products. These LD bags, LD plastic bags and LD rolls prevent the product From Dust/Rain and Transit Damage.*

## **12. LD / pp pouch & flexo printing**

*LD Bags are used to keep the inner item leak proof and if used for dry product then the LD PP pouch prevent the inner item safe from outer liquid it also prevent the inner items to come in contact to air which makes it a perfect leak proof and air tight.*

## **13. Paper bag for industrial chemical and multi purpose**

*A paper bag is a bag made of paper, usually Kraft paper. Paper bags are commonly used as shopping bags, packaging, and sacks.*

## **14. Designer paper bag for shopping and multi purpose**

Designer paper bags are the new trend as they are 100% eco-friendly, easily disposable and look so beautiful. We make the best eye attracted as well as cost effective shopping paper bags.

## **15. Green shed net**

Green Net are Used for raising nurseries of fruits and vegetable. This Plastic Net Protects crops from natural weather disturbances such as wind, rain, hail, frost, snow, bird and insects. Agro Net is used in production of graft saplings and reducing its mortality during hot summer days.

## **16. Jute shopping bags**

Jute is eco friendly fiber, it's degradation is natural and jute come from plants and its natural. Bags made out of it are highly strong, durable, and attractive in looks.

Jute bag are Reusable, Environmental friendly. It is 100% bio-degradable and recyclable, it is really Cost effective. Jute bags are Strong and can carry more weight as compared to promotional carry bags. It is Durable and long lasting.

## **17. Bopp rice bag & salt bag**

Biaxial Oriented Polypropylene (BOPP) bags are produced by laminating a reverse printed film to a woven fabric which is then manufactured into a bag. The film is stretched in both the machine direction (MD) and across machine direction (AMD). The result is a material with superior strength at low gauges, flatness, clarity, and excellent printability. This construction is in high demand due to its strength and superior picture-like print quality. Printing is achieved by applying the inks directly onto the film which is adhered to a woven fabric using a laminate coating. BOPP film is reverse printed, resulting in a protected interior print (between the film and laminate/woven fabric) which will not scratch or be easily damaged during normal use. The BOPP bag's appeal includes dimensional stability, maximum water resistance, and high impact graphics that improve marketability, as well as optional anti-skid features.

## **18. Aluminum foils pouch & bag**

The bag can be used in the packaging of various products in the non-food and food industries. They include pharmaceuticals, cosmetic products, used for stocking fresh meat, poultry, smoked salmon, goji berries and dried fruits. Additionally, these pouch bags are made of aluminum foil to protect the contents from moisture, UV light, and oxygen infiltration. Available in zipper pouch, standing zipper pouch, standing pouch, window pouch ,etc..

## **19. Multi color two & three layers pouch for spices & other product & multi color Gravure printing**

Multi-layered packaging is multilayer or composite materials using innovative technologies aimed to give barrier properties, strength and storage stability to food items, new materials as well as hazardous materials. Multiple layers are formed by co extrusion, lamination, or various coating technologies. Zipper pouch, standing zipper pouch, standing pouch, window pouch ,etc..

## **20. Non woven carry bag & shopping bag**

**Non-woven bags** are bags made from non-woven polypropylene (PP) fabric. This fabric is made with spun and bond polypropylene fiber, which is soft, smooth and air-permeable. In a spun laid non-woven material the fibers are directly taken onto a moving web which arranges them randomly. The unprocessed web looks somewhat similar to cotton. The fibers on this web are then bound together thermally or mechanically. This material makes non-woven bags durable, attractive, breathable, reusable, water resistant, hypoallergenic, fire resistant, soft, light, and sometimes washable. The material for these bags is strong enough to last up to 5 years. An additional benefit of these bags is that they are easily printed with a company logo and advertisement; non-woven bags are a great tool in corporate branding and are attractive as gifts.
